<b>Notes</b>	<ul style="list-style-type: none"> <li>• RCD (residual current device): RCDs are life-saving devices which are designed to prevent you from getting a fatal electric shock if you touch something live, such as a bare wire</li> <li>• LATCHING or PASSIVE: When the power is lost due to an earth fault, the RCD trips out and isolates the circuit it is protecting. Latching RCD's do not trip during power cuts so they are great for fridges, freezers, fish tanks, battery charging and also for protecting remote/unmanned areas</li> <li>• Surface mounting box included</li> </ul>
