## **DATASHEET - PLSM-C6-MW**

Miniature circuit breaker (MCB), 6 A, 1p, characteristic: C

Part no. PLSM-C6-MW Catalog No. 242200

EL-Nummer (Norway)

0001609164

Similar to illustration

| Delivery program                                     |                 |    |  |
|--|-----------------|----|--|
| Basic function                                       |                 |    | Miniature circuit-breakers                             |
| Number of poles                                      |                 |    | 1 pole   |
| Tripping characteristic                              |                 |    | С  |
| Application  |                 |    | Switchgear for residential and commercial applications |
| Rated current  | In              | Α  | 6  |
| Rated switching capacity according to IEC/EN 60898-1 | I <sub>cn</sub> | kA | 10   |
| Product range  |                 |    | PLSM   |

## **Technical data** Electrical

| Rated switching capacity according to IEC/EN 60898-1 | I <sub>cn</sub> | kA | 10 |  |  |  |

|--|-----------------|----|----|--|--|--|

## Design verification as per IEC/EN 61439

| Technical data for design verification   |                   |    |   |
|--|-------------------|----|---|
| Rated operational current for specified heat dissipation   | In                | Α  | 6   |
| Heat dissipation per pole, current-dependent   | P <sub>vid</sub>  | W  | 0   |
| Equipment heat dissipation, current-dependent  | P <sub>vid</sub>  | W  | 1.5   |
| Static heat dissipation, non-current-dependent   | $P_{vs}$          | W  | 0   |
| Heat dissipation capacity  | P <sub>diss</sub> | W  | 0   |
| Operating ambient temperature min.   |                   | °C | -25   |
| Operating ambient temperature max.   |                   | °C | 75  |
|  |                   |    | linear, per +1 °C, results in a 0.5% reduction of current carrying capacity |
| EC/EN 61439 design verification  |                   |    |   |
| 10.2 Strength of materials and parts   |                   |    |   |
| 10.2.2 Corrosion resistance  |                   |    | Meets the product standard's requirements.                                  |
| 10.2.3.1 Verification of thermal stability of enclosures   |                   |    | Meets the product standard's requirements.                                  |
| 10.2.3.2 Verification of resistance of insulating materials to normal heat   |                   |    | Meets the product standard's requirements.                                  |
| 10.2.3.3 Verification of resistance of insulating materials to abnormal heat and fire due to internal electric effects |                   |    | Meets the product standard's requirements.                                  |
| 10.2.4 Resistance to ultra-violet (UV) radiation   |                   |    | Meets the product standard's requirements.                                  |
| 10.2.5 Lifting   |                   |    | Does not apply, since the entire switchgear needs to be evaluated.          |
| 10.2.6 Mechanical impact   |                   |    | Does not apply, since the entire switchgear needs to be evaluated.          |
| 10.2.7 Inscriptions  |                   |    | Meets the product standard's requirements.                                  |
| 10.3 Degree of protection of ASSEMBLIES  |                   |    | Does not apply, since the entire switchgear needs to be evaluated.          |
| 10.4 Clearances and creepage distances   |                   |    | Meets the product standard's requirements.                                  |
| 10.5 Protection against electric shock   |                   |    | Does not apply, since the entire switchgear needs to be evaluated.          |
| 10.6 Incorporation of switching devices and components   |                   |    | Does not apply, since the entire switchgear needs to be evaluated.          |
| 10.7 Internal electrical circuits and connections  |                   |    | Is the panel builder's responsibility.                                      |
| 10.8 Connections for external conductors   |                   |    | Is the panel builder's responsibility.                                      |
| 10.9 Insulation properties   |                   |    |   |
| 10.9.2 Power-frequency electric strength   |                   |    | Is the panel builder's responsibility.                                      |
| 10.9.3 Impulse withstand voltage   |                   |    | Is the panel builder's responsibility.                                      |

| 10.9.4 Testing of enclosures made of insulating material | Is the panel builder's responsibility.   |
|--|--|
| 10.10 Temperature rise                                   | The panel builder is responsible for the temperature rise calculation. Eaton will provide heat dissipation data for the devices. |
| 10.11 Short-circuit rating                               | Is the panel builder's responsibility. The specifications for the switchgear must be observed.                                   |
| 10.12 Electromagnetic compatibility                      | Is the panel builder's responsibility. The specifications for the switchgear must be observed.                                   |
| 10.13 Mechanical function                                | The device meets the requirements, provided the information in the instruction leaflet (IL) is observed.                         |

## **Technical data ETIM 7.0**

Concurrently switching N-neutral

Additional equipment possible

Degree of protection (IP)

Width in number of modular spacings
